

E1 overlap with the fixtures, validity, cost (RQ1, RQ2)

2 providers (Claude Sonnet 4.6, GPT-4o) x 2 runs = 40 LLM cells; tokens and latency logged

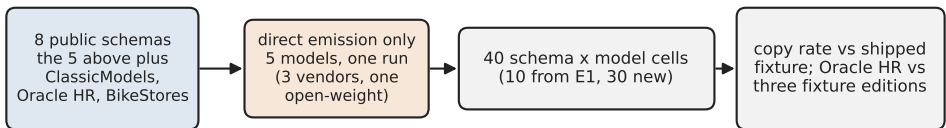

E1b renamed-schema control (RQ1)

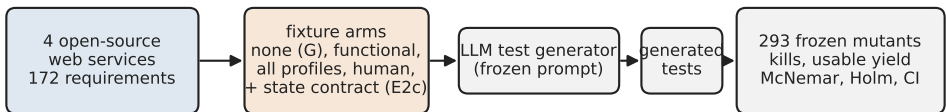

deterministic
renamer

E1c copy rate across models and schemas (RQ1)

E2 exploratory: provisioned data downstream (RQ3)

Every input checksummed; every number regenerated by released scripts (Zenodo; see Data availability)
